	3.5mm Audio Jack
Warranty	1 Year Limited Warranty
Dimensions (W x D x H)	270 x 49.2 x 16.95 mm (including cable)
Power requirements	Powered from VBUS 5 Volts Supports PD Charging, Max level 20V/3A
Environmental	
Operating temperature	0° C to 45° C (32° F to 113° F)
Operation humidity	10% to 85%, non-condensing
Storage temperature	-10° C to 60° C (14 ° F to 140° F)
Storage humidity	5% to 90%, non-condensing
Regulation Approvals	
Certifications	FCC; CE

3.0 How to operate

(Does not require additional program installations or Drivers)

Connection to the computer or mobile device

Connect MediaGear's Mini Dock to your computer or mobile device by plug in the Type C connector in to your computer or mobile device's Type C port.

Connecting USB devices

This Mini Dock has one USB C 3.0 port and three USB type A 3.0 ports. Use these ports to sync your Smartphone or Tablet with your Laptop or to connect external USB devices, such as a flash drive, keyboard, mouse and more.

Connecting an HDMI display device

You can connect your laptop or SmartPhone via Mini Dock to a high-definition television or monitor through the HDMI port. To transmit video signals through the HDMI port, you need a HDMI cable (sold separately).

Connecting to Ethernet

Connect to a secured internet line by plugging in a network cable (not included) into the RJ45 output and plugging the other end into the network hub, switch, or router.

Connecting to Headphones with Mic or Speaker

Plug in your compatible headphones or speakers to the 3.5mm audio jack for vibrant sounds.

To Charge Devices

Plug in Type C power adapter to Type C female connector to charge your Type C device. (Type C male connector must plug into your Type C device's Type C power input. Plug into regular Type C port on your device will not charge your device).

Data Transfers: microSD Card, SD Card, USB C, USB 3.0

Mini Dock allows for data transfer from a microSD card or SD Card by inserting the respective cards into the card reader slots, or using an external memory device (thumb drive/external hard disk) to transfers data between devices. It will work individually to read and transfer data, not simultaneously. Your laptop or tablet should automatically detect it. On your Android SmartPhone you will see it in your device File Manager. You can also transfer data between devices via the USB C and USB 3.0 Type A ports.

3.0 Connection graph

Thank you for your purchase and please write a review for your new product. Your feedback is truly valuable to us!
